PROTECTING YOUR BIKE SAVING YOU MONEY

WE COVER WHAT YOUR
INSURANCE WON'T

Autrella's motorcycle extended service plan team is a group of seasoned motorcycle riders and enthusiasts who understand what it means to be on two wheels. We also know having the right coverage is important. The fact is, today's leading U.S. big twin motorcycle engine is our biggest customer.

Aftermarket pipes or other performance modifications will likely void your engine and drive train coverage from the factory warranty and the engine and drive train coverage from the factory-endorsed extended service contract as well. Our company was built to help our fellow riders stay on the road.
